## With more connectivity to the factory floor.

If you've been using special-purpose devices to connect your process control or manufacturing automation systems, <PreferredCompanyName> has a better way.

Let <PreferredCompanyName> show you how you can replace special-purpose technologies and converge factory networks onto an Ethernet manufacturing network with industrial-grade Cisco Catalyst 2955 Series Ethernet switches. Connect a variety of technologies for more efficiency, with increased collaboration and information sharing, and lower operating costs.

**Find out how your factory could be more productive with a Cisco Ethernet solution from <PreferredCompanyName>. Call <PreferredCompanyName> at <TelephoneNumber>, or visit us online at <WebURL>.**
